Real and Perceived Barriers to ULLs by Shahryar Ershad Sarabi

PANEL DISCUSSION with representatives from UNaLab partner cities

# Urban Living Labs for developing Nature Based Solutions: Understanding their Key Components

#### **UNaLab Online Webinars**

By: Abdolrasoul Habibipour

Information Systems Luleå University of Technology

2020-11-24

#### Learning outcomes of this session

- To make the participants **familiar** with the **concept** of Urban Living Lab **as a whole** and its key **components**.
- > To understand how NBS can be developed following an Urban Living Lab approach.
- To give the participants a better **understanding** of how an Urban Living Lab can be set up and run by considering different phases of innovation development and different actions/activities that can be done.

#### What is a Living Lab?

"LL is one approach to manage open innovation processes, where various stakeholders and individual users are involved to cocreate, test, and evaluate innovations in open, collaborative, and real-world settings"

#### **Theoretical Areas**

- > Open Innovation
- > Socio-technical systems
- Design Thinking
- Participatory Design
- > Innovation management
- > Stakeholder Theory

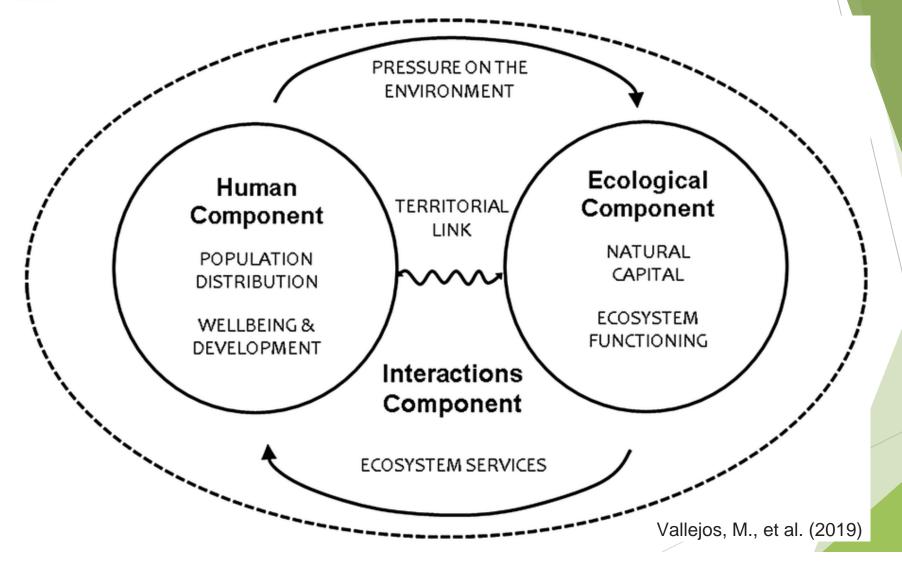

#### Human and innovation

- ► 55% of the world's population lives in urban areas → 68% by 2050 (United Nations)
- Cities as milieu for innovation with citizens
  - ► Large scale innovations
  - ▶ Digital innovations
  - ► Etc...

#### Socio-ecological systems perspective

### What is an Urban Living Lab?

"An urban living lab is a **local place** for innovative solutions that aims to solve **urban challenges** and contribute to long-term sustainability by actively and **openly co-creating** solutions with **citizens** and **other stakeholders**."

## **Urban Living Lab Framework**

#### Governance and management

> The way that an Urban Living Lab in the strategic or operational level is

managed and organized

- > Urban Living Lab vision and scope
- > Risks management
- > Risk assessment
- > Closing the project
- > Knowledge sharing
- ➤ Dissemination

#### Financing and Business models

> A business model that creates, delivers, and captures value for all Urban Living

#### Lab stakeholders

- > Revenue stream
- > Value
- > Crowdfunding
- > Cost structure
- > Financers
- > Resource allocation

#### Urban Living Lab real-life context

- > The physical setting in which the NBS will be implemented
  - > Place
  - **>** Ownership
  - ➤ Physical infrastructure
  - > Technical infrastructure
  - > Future plans
  - ➤ Responsibility
  - > Activities

#### Nature based solutions

- Key characteristics of nature-based solutions in ULL
  - Address sustainability challenges
  - Real-world situations
  - Using nature
- ➤ Value co-creation
- > Activities
- > Innovation setting

#### Key stakeholders

- Quadruple-helix approach
- > Citizens have different roles
  - Affectee (passive)
  - > Experimenter
  - Innovator
  - > Lead participants
  - > Tester

#### > Stakeholder engagement

- Objective to contribute
- Motivation
- Degree of involvement
- Activity type
- Membership model

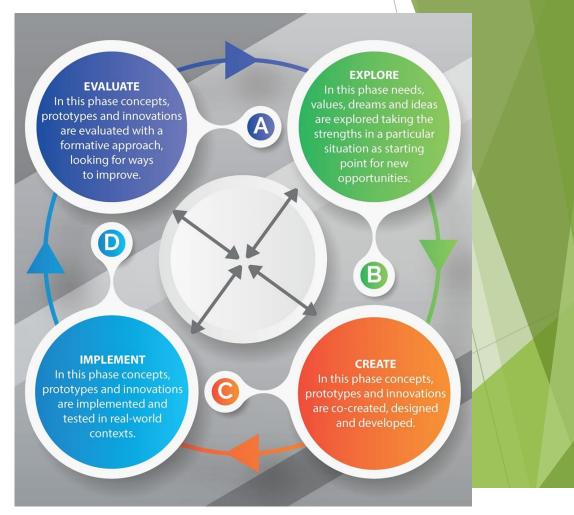

#### Approach and method

- Urban Living Lab approach includes
  - > Data collection and analysis methods
  - Co-creation methods and techniques
  - > Engagement methods
  - > Engagement tools

#### **ICT-infrastructure**

- > Existing and desirable ICT tools and infrastructures that support ULL activities
  - > Hardware
  - Software
  - > Data
  - Network
  - Devices
  - Solutions

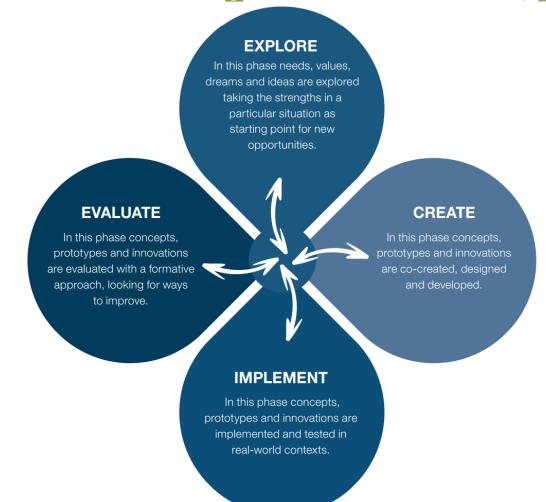

# Main phases of innovation process in Urban Living Labs

- > Planning
- > Exploration
- > Co-creation
- > Implementation
- > Test and Evaluation
- Adoption

#### > Planning phase

- The background and type of the NBS that will be developed in Urban Living Lab
- ➤ Aim and scope of the <u>Urban Living Lab</u>
- > Different perspectives of the desired NBS
- > Relevant skills that are needed within the Urban Living Lab setting
- The context of NBS development (city, home environment, workplace, etc.) in which the Urban Living Lab projects are located
- > Barriers of setting up and running the Urban Living Lab

## > Planning phase checklist (1)

- > Who has the **power** to influence the ideas?
  - > who makes the decisions
  - > who are the informal leader that should be contacted
  - > who can **stop** the Urban Living Lab or NBS process?
- > What risks are associated with the Urban Living Lab set up?
- ➤ What is the <u>Urban Living Lab</u> vision?

#### > Planning phase checklist (2)

- ➤ Identifying the target user group, citizens, visitors, customers, potential users, as well as non-users.
- > Are there any **ethical** considerations that need to be considered before starting the NBS development?
- ➤ Which important **time frames** need to be handled?
- > Stakeholder identification: Who are relevant stakeholders that should be involved?
  - > Public sector
  - > Private sector
  - > Academia
  - ➤ Citizens
  - ➤ Others

- > Exploration phase checklist (1)
  - ➤ What is the **NBS** vision and scope?
  - > What technical **equipment** does the NBS require?
  - > What in the context might influence the NBS development?
  - > What **problem** or **opportunity** does the NBS aim to contribute to?
  - > What competencies and resources are important to be involved in the process?
    - > Content providers
    - ➤ Distributors
    - > ICT consultant
    - ➤ Developers
    - > Customers
    - ➤ Citizens
    - ➤ Other

- > Exploration phase checklist (2)
  - ➤ How to motivate different stakeholders and citizens to be engaged in the innovation development process?
    - ➤ Winning the prize
    - > Monetary incentives
    - > Learning
    - > Technology in return
  - ➤ How to **keep** them **engaged**?
  - ➤ How to form a positive **dialogue** and **contact** with the relevant stakeholders?
  - > Does the NBS start based on open calls?
    - ➤ Is it disseminated in public channels?

- > Co-creation phase checklist (1)
  - > What **ICT infrastructures** for co-creation activities are needed?
    - > Hardware
    - > Software
    - ➤ Data (public, private)
    - ➤ Networks (4G, fibre, etc.)
  - > How should citizens be engaged in the NBS process?
    - > Interviews?
    - ➤ Workshops?
    - > Focus groups?
    - ➤ Gamification
    - ➤ Observations?
    - ➤ Scenarios, visual?
    - ➤ Narratives?
    - ➤ Other?

- > Co-creation phase checklist (2)
  - Decide how to record the collected data from the co-creation activities
     Camera, Notes, Video, Audio, Other...
  - > Are the Living Lab key **principles** addressed in the co-creation phase?
    - > Value, Sustainability, Openness, Realistic
  - ➤ What **supportive tools** are required for co-creation?
  - > What value is co-created in the process for all stakeholders?

- > Implementation phase checklist
  - Which activities does the context of NBS development currently support?
  - > Which physical infrastructure is available?
    - > Streets
    - **➤** Districts
    - > Parks
    - ➤ Electricity, 4G, etc.
    - > others
  - ➤ Who can **experiment** with the NBS?
  - > Are the Living Lab Key Principles addressed in implementation phase?
    - ➤ Value, Sustainability, Openness, Realistic

- > Test and evaluation checklist (1)
  - > What is the aim of the test and evaluation of the NBS?
  - ➤ Which data collection methods should be used in the NBS test and evaluation?
    - > Observations, Interviews, Focus-Groups, Diaries, Questionnaires, Other
  - For how long period of time should the NBS test last?
  - > What technical equipment does the NBS test and evaluation require?
  - ➤ Which **technical infrastructure** is there **available** in the context to **test** and evaluate NBS?
    - ➤ Fiber, Wi-Fi, 4G, Sensors, IoT

- > Test and evaluation checklist (2)
  - > Are the Living Lab Key Principles addressed in the test and evaluation phase?
    - ➤ Value, Sustainability, Openness, Realistic
  - > How many users should be recruited for NBS test and evaluation?
  - What are selection criteria?
    - > Age, Gender, Occupation, Technical skills, Knowledge and competence
  - > What ethical considerations need to be handled during the test and evaluation process of NBS?
    - ➤ Unwitting participation? (e.g., in crowdsensing)
    - ➤ Voluntariness of citizen engagement?
    - > Cost and benefits of engagement for the citizens?
    - > Consent form?
    - > Others?

#### > Adoption phase checklist

- > Who are the main adopters of the NBS in an Urban Living Lab context?
- ➤ In which **social** context is the NBS planned to be adopted?
- > In which physical context is the NBS planned to be adopted?
- ➤ In which **technical** context is the NBS planned to be adopted?
- ➤ In which **organisational** context is the NBS planned to be adopted?
- ➤ What **barriers** are associated with the adoption of NBS?
- > How should the identified NBS adoption barriers be tackled?
- > Are the Living Lab Key Principles addressed in the adoption phase?
  - ➤ Value, Sustainability, Openness, Realistic

#### > Citizen engagement principles

- Citizen engagement must be voluntary.
- ➤ Think about **heterogeneity**: attempt to maximise the difference between different categories of citizens.
- ➤ Be **inclusive** to maximise the difference among user categories, all kinds of ages need to be represented.
- > Engage citizens who are **flexible** towards change and have a strong social competence.
- Attempt for a balanced **gender distribution**. Traditionally, male engagement leads to developments focused more on **technical** performance, while female engagement leads to developments with a focus on **human** needs and expectations.
- > Citizen selection should be on those who are in different level of knowledge about the area of NBS.

## Questions?

#### **BOTNIA** LIVING LAB

# Interactive workshop Urban Living Lab Framework toolkit

#### The workshop instruction

- Open the shared google sheet (the link can be found in the chat box) and find the sheet in the name of your group (7-9 participants in each group):
  - https://docs.google.com/spreadsheets/d/11zdfa2pmrStS1N373pk7yfDm7cYgr1SsQLLcM5uzue0/edit#gid=571899880
- > Try to find a connection between each development phase (i.e., exploration, test and evaluation, etc.) and the key component (i.e., key stakeholders, real-life context, etc.)
- Write in that cell what is relevant in each phase considering each key components (some examples are provided)
  - > what actions can be done in exploration phase of an innovation
  - > what is **relevant** in the planning phase in relation to the stakeholders
  - > barriers of stakeholder engagement in implementation phase
  - > you can write in a general level or very specific.
- Decide in your group who will share the insights (one minute)
